Full Description: Canned Whole Kernel Corn is prepared from succulent yellow corn consisting of cut kernels of corn packed with water, sugar and salt. The product is packed in hermetically sealed containers and sufficiently processed by heat to assure preservation.

Quality Characteristics:

Quality	Must meet USDA Grade A. Must comply with the US Standards of Grades of Canned Whole Kernel Corn, with modifications noted within these specifications.
Color	Product shall possess a practically uniform, bright color typical of the product.
Maturity	Kernels are tender and are in the milk or early cream stage of maturity.
Defects	Practically free from defects. The presence of husk, silk, pieces of cob, EVM and discolored kernels shall not more than slightly detract from appearance of product.

Physical Characteristics:

Seneca Foods Corporation produces our products to meet a target specification at the time of production. Due to the nature of our commodity products, there are factors such as product maturity, variety, moisture level, and the growing conditions of each particular field which may cause a deviation from the target specification as the product cycles through the shelf life.
